OVERVIEW

In this game, teams will find sections of hidden string and tie them together in an attempt to create the longest string. The team that creates the longest string wins!

WHAT YOU'LL NEED

- At least 3 teams of 2 players each (This game can be played with as many teams as you like!)
- 300 feet of string
- Scissors

HOW-TO

PREP

- Cut the string into about 100 pieces ranging in size from 6 inches to several feet.
- Hide the sections of string around your environment before students arrive.

PLAY

Select your teams and have them stand together at the front of your environment. On your "Go," teams will search for the sections of hidden string. As each string is found, teams will tie their strings together to create one long string per group. When all of the hidden strings have been found, ask each team to stretch out their knotted strings side-by-side. The team with the longest string wins.
